

# Engineering the future for girls @ the University of Strathclyde 19th-23rd June 2017

Join us in shaping the world in a simple,  
safe and efficient way.

**Are you a girl in S3  
going into S4 thinking  
about your future career?**

**Are you about to choose your key subjects or thinking what your options are beyond school, then why don't you join us for a week of fun and inspiration.**

**We have created five days of activities to help you find out your talents and make the words "I can do it" your new motto!**

Employees from BP and BAM Nuttall and Researchers from the University of Strathclyde will engage you in a range of challenges that will inspire you to consider a career in engineering.

If you see yourself as an engineer of the future or have never considered engineering as a career option before, but want to find out more about it, then the Engineering the Future for girls week at the University of Strathclyde is just for you.
